WATCHGUARD DIMENSION

Bringing Big Data Visibility to Network Security

From the board room to the branch office, the pace and complexity of decision-making about network security has been increasing. How can you ensure that your decisions are timely, effective, and better informed? You need Visibility. This is when you most need your data visualized and presented from the Cloud so that you can quickly see high-level trends compared with important thresholds, and drill down to the details to determine the correct course of action. This kind of visibility dashboard is now an essential tool required for today's network security solutions.

> *With a combination of WatchGuard's UTM and Dimension solutions, my team can view the entire network health in real time, investigate choke points and implement policies to solve the problem. All of this can be done in less than an hour.*
>
> ~ Tony Sim, IT Manager, EpiCentre

START WITH THE BIG PICTURE

A picture is worth a thousand words. Get a high-level, aggregated "big picture" view of network activity across all your Firebox® appliances that pinpoints top threats and trends, active policies and traffic patterns, and correlated views of top users and applications.
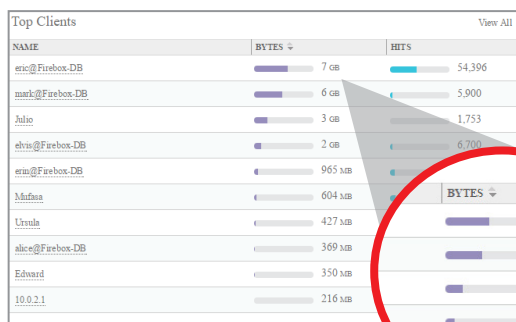

TAP INTO VISIBLE INSIGHTS

See network activity presented visually, in real time, in intuitive and interactive dashboards and reports. The elegant visualizations make it easy to identify potential threats, monitor Internet usage and gain critical insights about related traffic trends. See, at a glance, who is consuming the most bandwidth, if there are unusual traffic patterns, and what the most-visited websites are. Easily pivot, drill down, and filter to get exactly the info you need, when you need it.

SPOT PATTERNS, MAKE BETTER DECISIONS

You can choose from more than 100 comprehensive reports, with the ability to pre-schedule reports for email delivery to key stakeholders in your organization. Options include summary and detail views, and special reports for HIPAA and PCI compliance. The Executive Report is a high-level summary tailored for C-level executives, IT directors, compliance officers, and small business owners.

THEN TAKE ACTION WITH DIMENSION COMMAND

Dimension Command is our suite of management tools for WatchGuard Dimension. With it, IT pros have access to a host of network control features including one-click configuration changes, the ability to jump back to previous configurations, direct access to individual appliances through a web UI, and VPN management tools. Dimension Command is a purchase upgrade, and is automatically included in our Total Security Suite.
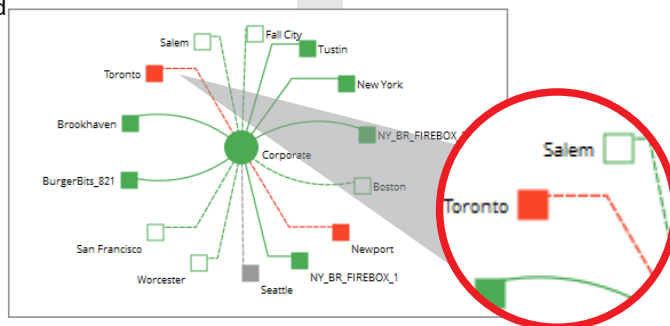

FEATURES & BENEFITS

- No complicated set-up required. Simply deploy as a virtual appliance on a public/private Cloud, or on your server, desktop, or laptop.

- Instantly turns raw network data into actionable security intelligence to support quick preventive or corrective response to security issues.

- Network activity is delivered in the big data visualization style today's users have come to expect.

- Over 100 comprehensive reports and dashboards.

- Identifies important security issues and trends so you can make better policy decisions across the network.

THE POWER OF VISUALIZATION

FireWatch filters traffic in a way that instantly highlights the most critical information on active users and connections.

FireWatch easily answers

- Who consumes the most bandwidth?
- Are there unusual traffic patterns?
- What is the most popular website visited?
- Which applications are used by specific workers?
- Which applications consume the most bandwidth?

ZERO INSTALL

No complicated set-up required. Simply deploy a virtual appliance – includes OS, database, utilities, and WatchGuard server software.
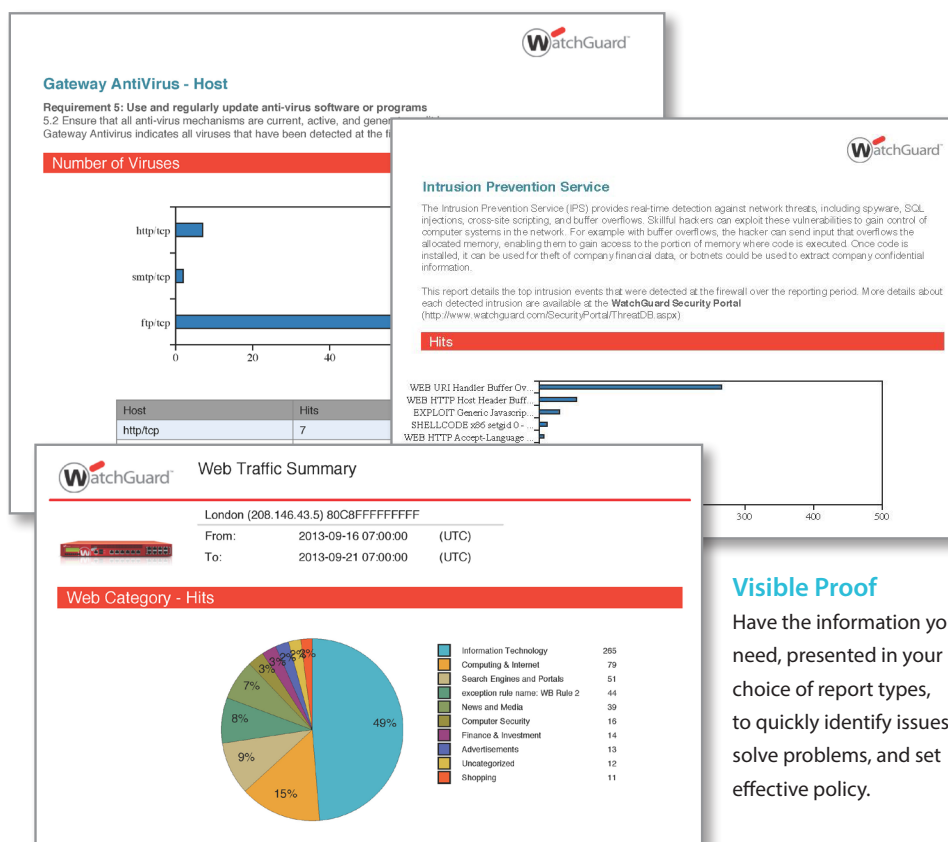

Threat Map

Instantly see by location where threats are coming from. A few clicks will tell you exactly which IP to block to protect your network.

Maximum Flexibility

You have the option to pivot, drill-down, and filter to get exactly the information you need, when you need it.

SPOT PATTERNS, MAKE BETTER DECISIONS

You can choose from more than 100 comprehensive dashboards and reports, with the ability to pre-schedule reports for email delivery to key stakeholders in your organization. Options include summary and detail views, and special reports for HIPAA and PCI compliance. The Executive Report is a high-level summary tailored for C-level executives, IT directors, compliance officers, and small business owners.

Visible Proof

Have the information you need, presented in your choice of report types, to quickly identify issues, solve problems, and set effective policy.

DIMENSION COMMAND

Dimension Command is the suite of management tools for WatchGuard Dimension. With it, IT pros don't just see what's happening on the network, they can take immediate action right from the dashboard. Contact your authorized WatchGuard reseller to see a demo.

Seeing is believing.
